

Reporting on production

CLOUD PRODUCTON DATA DETECTION SOFTWARE

control pf all production and Supply Chain data in real time.

The software that aids data collection in all processing phases, to optimize production.

SOFTWARE

Reporting on production is the cloud application from the Oltre Suite that can:

- Provide real, objective data that is essential for optimizing company production processes. Each processing phase is monitored to check progress of performance, based on statistics and historical data.
- manage items, orders, production phases and production cycles for a detailed, current vision of your production.
- Avoid data entry errors and data unreliability.

Reporting on production

REPORTING ON PRODUCTION IS AVAILABLE:

Cloud

Services can be obtained without installing the software. Reporting on production will be hosted on our servers where the data will be subjected to daily backups.

On-site

Thanks to the pay per use solution you know the monthly cost exactly, with no surprises.

In order to always be up to date...

The cloud application allows you to connect all the network devices, allowing them to communicate.

This means a more complete approach with regard to operational control.

Information can easily be found and shared in the company.

SOFTWARE CHARACTERISTICS:

Rapid: once the contract is activated, the application is ready to use, without the need to install any software.

Compatible with all web browsers (MSIE, Mozilla Firefox, Opera, Safari, Chrome).

Mobile: with the Oltre APP, available on Play Stores, collaborators on the move are always in touch with the company.

Integrated: the Oltre Suite shares the same database, so each APP can be integrated with the other APPs in the Suite.

Shares: you always have a full picture of production in real time.

Simple: The operator interface for the package was designed to make it as intuitive as possible.

Efficient: Management of production activity is smart thanks to Reporting on production. It is possible to trace data and record each production process in order to optimize the work flow for the entire supply chain, canceling out errors and identifying improvement points in the chain and business.

Functional: Actual employee production time calculation is easy and instant.

Reporting on production You can monitor progress of your production via the web.
