

Shift Management

CLOUD SHIFT MANAGEMENT SOFTWARE

to organize your workers' shifts in an excellent manner

SOFTWARE

Shift Management is the new application that manages work shifts autonomously (it can be used in stand-alone mode or integrated with third-party systems) that:

- Creates work plans according to the various needs of both people and the company itself: Employee contractual obligations, homogeneity in allocation of work among workers, the service to be guaranteed for company activities, etc.
- It allows rational, homogeneous organization of work shifts, reducing the request for overtime and workers on call, allowing the company to save on management time and costs considerably.
- It calculates data in real time. It allows the Human Resources Department to monitor and solve any problems that may cause a change in planned shifts quickly and efficiently.

Shift Management

SHIFT MANAGEMENT IS AVAILABLE:

Cloud

Services can be obtained without installing the software. Shift Management will be hosted on our servers where the data will be subjected to daily backups.

On-site

Thanks to the pay per use solution you know the monthly cost exactly, with no surprises. You only pay for the collaborators that are actually managed

It can be integrated... Shift Management, as an optional part of the suite, shares the same database as Oltre: Shift data is automatically processed in real time, by the attendance management software.

SOFTWARE CHARACTERISTICS:

Rapid: once the contract is activated, the application is ready to use, without the need to install any software.

Compatible with all web browsers (MSIE, Mozilla Firefox, Opera, Safari, Chrome).

Mobile: with the Oltre APP, available on Play Stores, collaborators on the move are always in touch with the company.

Integrated: the Oltre Suite shares the same database, so each APP can be integrated with the other APPs in the Suite.

It generates an optimal shift plan according to the set rules.

It calculates data in real time.

Simple: the operator interface has been designed to make it as intuitive as possible.

Powerful: The powerful calculation engine allows efficient, rapid and economic organization of shifts. A powerful, trusted ally for all sectors: hospitals, manufacturing companies, call centers, mass distribution, airports, supervision bodies, etc.

FUNCTIONS

- Badge Management
- Contracts Management
- Working Hours Management
- Task Management
- Needs Management
- Calendar Management
- Manage Departments/ Roles
- Employee Management
- Control of absences/ attendance situation
- Shift Changeover Management
- Absence Reason Management
