FTI "stores its security" with Zucchetti Axess solutions

FTI is a leading world class manufacturer of professional optical data storage media and archival solutions provider.

FTI offers to its partners strategic advantages essential to achieving success in a competitive marketplace.

The company is setting a new industry benchmark by providing superior quality media solutions and rapid fulfillment through ground breaking manufacturing and logistics operations.

FTI is one of the leading manufacturers of professional and archival recordable optical storage media in the world.

FTI is dedicated to creating optical media solutions that deliver the ultimate performance, reliability and durability for professional and archival applications.

FalconMedia, the brand of FTI, is highly appreciated and benchmarked by reputable international laboratories and certification bodies.

AXESS TMC

case history

Client Requirements

The most crucial requisites for the update and implementation of the new system in FTI were to control access in their production environment. They had to permit/deny specific staff to specific areas and ensure harmony in working environment. Time and attendance management and data collection with multiple shifts was another major task that had to be achieved. In addition, T&A readers had to be placed at every access point in the factory.

Achieved Project

FTI chose the most satisfactory solution proposed by Zucchetti Axess, based on XAtlas software to manage access control, T&A for data.

Why Zucchetti Axess?

Mr. Aftab Aalam

IT Manager - FTI

"I've been working with FTI since 2005 and I have experienced the 'Axess TMC competency' right from implementation to support throughout. I am convinced that Italian products ensure the same quality and better flexibility than German products - besides more competitive in pricing. This is why FTI made a decision to choose systems from Zucchetti Axess SpA which is now running perfect and fulfilling FTI needs."
