

CLOKI

Web Table Editor for
access control and
attendance monitoring.

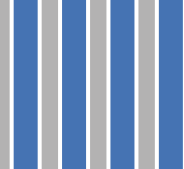

*CLOKI is included on
Zucchetti Axess terminals
and all it needs is a
browser to use it from any
PC.*

CLOKI is the pre-installed application on our terminals that provides simple to use access control management and attendance monitoring while using any browser (IE, Chrome, Firefox, etc...)

It is suited to anyone looking for a stand-alone Access Control and Attendance Monitoring system where the user data is not frequently changed.

Data management is simple and intuitive and no software needs installing on the PCs that intend to use it as it is WEB based.

Access Control

CLOKI for Access Control also allows configuration and monitoring of access at possible company entrances (doors, gates, turnstiles etc).

With CLOKI, it is possible to define:

- The opening hours that can be customized to each day and user
- The entrances
- Authorizations
- Users
- Badges (badge codes)
- Shifts and night shifts
- Tolerances and rounding up/down of entrance and exit times

Attendance Monitoring

CLOKI for Attendance Monitoring manages employee databases and obtains the attendance sheet with transactions and any justifications entered directly from the terminal.

With CLOKI, it is possible to:

- configure the total hours that can be worked each day and by each employee
- Enter/delete registrations of badges
- Automatically calculate the hours worked each day or month
- Manage holiday calendars
- Manage overtime and shifts

If Access Control and Attendance Monitoring needs should become more complex, more advanced software is available that is compatible with the same terminals.

Choose your terminal:
