

SAP Connector 2.0

SAP Connector 2.0 is the certified interface for data exchange between the SAP Time Management module and the attendance data collection subsystems of Zucchetti Axess, which offers a vast range of multifunction terminals with an excellent price/performance ratio.

SAP Connector 2.0 enables Zucchetti Axess data collection terminals to be used with the SAP R/3 4.5 or ECC 6.0 Time Management module. The basic functionalities include the automatic import of the list of employees (table DNPERSO) and the export of punch time (Table UPTEVEN).

SAP Connector 2.0 adopts ALE (Application Link Enabling) technology, using SAP JCo (Java Connector) libraries for information exchange. It consists of two components: the “connector”, which resides on the server and which exchanges data with SAP (master records, attendance/absence reasons, time events, etc), and the “validator”, which resides on the terminals and applies all SAP validity checks to data entered by users (white lists, time events, attendance/absence reasons, expenditures, etc).

AXESS TMC

a brand of Zucchetti Axess S.p.A

SAP Connector 2.0 makes it easy to activate connections to SAP systems and, at the same time, even to different systems.

This option is useful when migrating from an existing system to SAP, for example, or for feeding different applications such as a production control application.

SAP Connector 2.0 is designed and developed entirely by Zucchetti Axess. This means that the company is able to build customised interfaces if system requirements differ from the standard functions provided by HR-PDC.

LEADERS IN SECURITY

AXESS TMC is a brand of **Zucchetti Axess, an international leader in solutions and products for access, attendance and security management.**

The hardware and software design departments of Zucchetti Axess are constantly committed to the development of innovative solutions, chosen by an increasing number of businesses around the world to control the flow of personnel and vehicular traffic.

With a network of over 100 partners in Italy and a similar number of partners distributed in over 50 countries worldwide, Zucchetti Axess is the number-one choice for all needs relating to personnel and environmental security using the most advanced ICT technologies. Zucchetti Axess is part of the Zucchetti Group which, with over 1,800 employees and more than 73,000 customers, is a forerunner in the ICT sector both in Italy and in Europe.

A COMPLETE OFFERING

AXESS TMC solutions and products are scaleable and easy to integrate, meeting the needs of small businesses and industrial corporations alike.

As a member of the **Zucchetti Group,** a leader in the development of systems for human resource management, AXESS TMC is able to offer Access Control and Security solutions that are absolutely unparalleled in terms of their completeness and multi-application integration.
