

SuperGLASS 15

the terminal for the hospitality and catering world

SuperGLASS 15, the POS terminal with colour touch screen display and integrated RF reader, ideal for the hospitality and catering industry.

SuperGLASS 15 is the terminal for the hospitality and catering world: corporate and public canteens, restaurants, self-service restaurants, pubs, fast-foods, B&Bs, hotels, holiday centres and also gyms, spas, shops and businesses.

for pos

The terminal can be used to pay with fiscal regimes in place, using the specific fiscal printers (optional) or as a proprietary payment system to remove circulation of cash in places such as holiday villages, spas and gyms.

Optional System

With AXETICA©, the virtual prepaid system from Axess TMC you will be able to supply your guests with badges, tags or bracelets that they can use to make purchases inside your facilities in total safety and without having to manage cash and coins.

The AXETICA© system integrates automatic distributors for hot and cold drinks too, giving you the freedom to use a single payment system for all types of POS whether manned or unmanned.

AXESS TMC

ZUCCHETTI

SuperGLASS 15 is a modern and elegant POS system with integrated 15" touch screen and multi-technology RF reader for card payment applications.

The compact shape makes it suitable for any type of environment.

Thanks to the large display and configurable graphical interface, the staff can use SuperGLASS 15 easily and intuitively to quickly perform any operation.

The second 9.7" colour display (optional), on the customer side, makes the interface attractive and easy to use.

On board machinery control system

SuperGLASS 15 is also suitable for production control applications, simplifying data collection and allowing the interaction with all the typical functions of the production environment, such as time and cost allocation for the performed works.

The strengths

SuperGLASS 15 is a POS terminal perfect for every operational need: it interfaces with POS and other devices and accepts cash, credit cards and prepaid cards..

No hardware restrictions

SuperGLASS 15 is developed on the basis of industry standards and is available with Windows 10 or Windows POSReady 7..

Centralized management

Thanks to the centralized management, it is possible to manage different terminals and collect data about sales in order to produce analyses and reports, that are essential for management.

Online and offline functions

SuperGLASS 15 sends data in real time to the server via a local connection or via the internet. In the event of breakdowns in the network, the terminal works offline, storing data and sending it autonomously after the connection has been restored.
